

Wilbert B. Anadia

Taguig City, Metro Manila, Philippines | wilbertanadia@gmail.com | wilbert-online-portfolio.vercel.app | 09856227511

PROFILE

Analytical and detail-oriented Computer Science graduate with hands-on experience in full-stack web development, database management, SQL, IT support, data quality assurance, and software deployment. Experienced in developing secure web applications using Laravel, PHP, PostgreSQL, Livewire, Alpine.js, and Tailwind CSS, with a strong foundation in relational database design and structured data management. Skilled in troubleshooting technical issues, validating and cleaning data, optimizing digital workflows, and supporting reliable software and IT infrastructure. Adaptable technology professional with experience spanning software engineering, database systems, IT operations, and data annotation.

EDUCATION

Bachelor of Science in Computer Science

July 2026

Visayas State University

Relevant Coursework: Database Management Systems, Advanced Programming, Data Structures and Algorithms, Basic Statistics

EXPERIENCE

I.T. Specialist

2023 - 2025

Department of Computer Science, Visayas State University

- Provided technical support and IT infrastructure maintenance for computer laboratories, workstations, networking equipment, and local servers.
- Deployed, configured, tested, and maintained software environments, compilers, and integrated development environments (IDEs) used in programming and data science courses.
- Diagnosed network connectivity, bandwidth, and IP configuration issues to maintain reliable laboratory operations during critical examinations and academic activities.
- Performed troubleshooting and preventive maintenance on computing resources to support continuous availability of laboratory systems.
- Assisted users with technical issues involving computer systems, software environments, and network connectivity.

Virtual Assistant / Data Contributor

2019 - 2021

Remotask (CloudFactory)

- Processed, annotated, and audited complex 2D and 3D datasets for machine learning and artificial intelligence training applications.
- Performed data annotation, object recognition, bounding box labeling, and Named Entity Recognition (NER) tasks according to project-specific quality requirements.
- Maintained a data quality score above 85%, resulting in advancement to premium data tasks and Quality Assurance (QA) auditing panels.
- Reviewed large datasets to identify data anomalies, structural formatting errors, inconsistencies, and potential data quality issues.
- Collaborated with senior reviewers to improve dataset quality and reduce annotation errors and noise.
- Monitored individual productivity, data accuracy, and task completion metrics through centralized cloud-based performance dashboards.

PROJECTS

VSU-LHS SSLG Information and Financial Management System

(Full-Stack Web Development)

2025 - 2026

- Engineered a secure student information and financial management system to automate data tracking, financial records, and institutional financial distribution for the VSU-LHS community.
- Developed full-stack application architecture using the TALL stack (Tailwind CSS, Alpine.js, Laravel, Livewire), delivering responsive and dynamic web interfaces.
- Designed and implemented a relational database layer using PostgreSQL, including server-side validation and data sanitization for sensitive financial data.
- Developed custom dashboard and ledger functionality to streamline financial data management and reduce manual data-entry and formatting errors.
- Implemented role-based system workflows and data management functionality to support organizational operations and controlled access to system resources.
- Configured continuous deployment on Render, integrating automated build processes and database migrations with Git-based deployment workflows.
- Applied software development practices involving PHP, Laravel, SQL, PostgreSQL, Git, database management, data validation, and web application development.

TECHNICAL SKILLS

Programming & Web Development: PHP, Python, JavaScript, HTML5, CSS3, Laravel, Livewire, Alpine.js, Tailwind CSS

Database & Data Management: PostgreSQL, SQL, Relational Database Management Systems (RDBMS), Database Design, Data Validation, Data Sanitization, Data Cleaning, Data Entry

IT & Systems: Technical Support, Network Troubleshooting, IP Configuration, Software Deployment, Software Testing, IDE Configuration, Local Server Maintenance

Development Tools & Platforms: Git, GitHub, Render, Microsoft Excel, Google Sheets, Google Docs, Google Drive

Data & Analytics: Spreadsheet Modeling, Data Quality Assurance, Data Annotation, Data Auditing, Statistical Logic, Quantitative Analysis

AI-Assisted Tools: ChatGPT, DeepSeek, Claude, GitHub Copilot

Core Competencies: Problem Solving, Critical Thinking, Troubleshooting, Quality Assurance, System Integration, Time Management, Data Management

LANGUAGES

English, Filipino, Cebuano, Waray

INTERESTS

Reading, Chess and Strategy Games, Sudoku and Puzzle Solving
